

The figure is a box plot comparing the distribution of 'Condition' for two groups: 'Proposed' and 'Controller'. The y-axis is labeled 'Condition' and ranges from 0 to 100. The 'Proposed' group shows a very tight distribution of values, all clustered near 0. The 'Controller' group shows a much wider distribution, with many values extending up to 100. The plot includes individual data points (strip plot) and a box plot for each group.

Condition	Proposed	Controller
0	10	10
10	5	10
20	0	10
30	0	10
40	0	10
50	0	10
60	0	10
70	0	10
80	0	10
90	0	10
100	0	10
